iWand

The magic wand for a better life.

User Manual

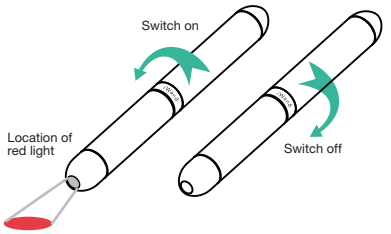
INTRODUCTION

The *iWand* is a powerful and portable non-contact healing device utilizing the *Euphoria Technology* working with a *Proton Vibration Alignment Field* (PVA Field) to strengthen the microcirculation of the body, which will relieve pain, boost immunity, promote metabolism and enhance external fluid absorption.

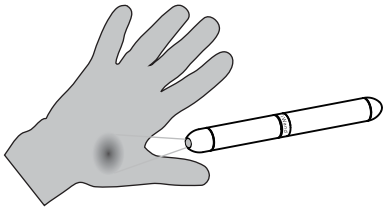
Features

- Speed up external fluid or ointment absorption into skin and deeper tissues.
- Relieve many types of pains (headaches, neck and shoulder pain, back pain, knee pain, arthritis, muscle aches, menstrual pain, etc), indigestion, insomnia, skin allergies and other chronic conditions.
- Immediate improvement of microcirculation.
- Enhance immunity.
- Promote metabolism.
- Quick recovery from fatigue and pain caused by poor microcirculation.
- Non-invasive acupuncture.
- Applicable for all areas including infected skin, wounds and areas covered with hair.
- Free from stimulus response and allergic reaction.
- Contactless.
- No side effects.
- Completely safe and easy to use.
- General health care with daily use.

OPERATION GUIDE



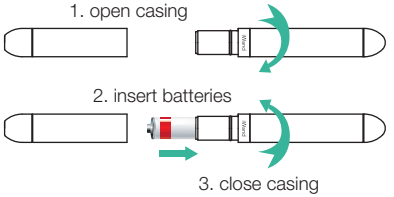
1. Select the targeted skin area. This might be an area covered with external fluid, a pain area or specific acupoint. Turn on the *iWand* and aim the flashing red light onto the selected location. (Suggested usage duration: Absorption purpose - 1 minute; Healthcare purpose - 5 minutes; Pain Relief purpose - 10 minutes).



2. When finished, turn off *iWand* until red light is switched off.

BATTERY REPLACEMENT

1. Turn *iWand* in counter clockwise direction to open the casing.
2. Insert two 1.5V AAA size batteries (suggested to use Alkaline batteries, do not use rechargeable batteries).
3. Turn *iWand* in clockwise direction to close the casing. Avoid turning *iWand* too tight to turn it on accidentally.



Cautions for operating iWand

- Do not direct *iWand* toward the eye.
- Stop using *iWand* when there is discomfort.
- Children or persons who are unable to express themselves, should seek medical advice before use; children must be accompanied by adults when using *iWand.*
- For battery operation, *iWand* works only with 1.5V AAA size battery. Do not use rechargable battery.
- Clean *iWand* by dry towel. Do not clean *iWand* with water, detergent, organic solvent or bleach.

PRODUCT INFORMATION

Carefullly review the following cautions for proper and safe conditions when using *iWand*.

Cautions

- Do not direct *iWand* toward the eye.
- Do not use *iWand* in areas of high temperature, high humidity or under direct sunlight.
- Do not open, repair, modify, remove parts, make use of components not provided by *iWand*, throw the device from high place or put too much pressure to the device.

Storage

- Store *iWand* in the dry environment. Do not place *iWand* in areas of high temperature, high humidity or under direct sunlight.
- Remove the batteries if *iWand* will not be used for extended period of time.

PACKAGING

1. iWand (1 pc)
2. Pouch (1 pc)
3. User Manual (1 pc)
4. 1.5V AAA Batteries (2 pcs)

WARRANTY

There is 1 year warranty service (free labour and components cost) from the purchase date. Customer will be required to present the original invoice stating the serial number for repair or service during the warranty period.

The customer will contact the local distributor (details refer to our web site) or dealer for more details about the warranty service. The device must be inspected by IPC's appointed authorized representative. The customer will be informed whether the unit can be repaired immediately or sent back to the manufacturer, or replaced wholly.

IPC reserves the right for the final repair period. The local distributor will contact the customer to collect the repaired device after service. If there is no local distributor or repair centre for the customer, he / she should contact the corresponding dealer to arrange the repair service. Customer is responsible for all shipping costs and liabilities.

If there is any additional repair cost involved, the local distributor will inform the customer about the repair cost. Repair will take place once confirmed by customer.

If the components or the particular model has been discontinued, the local distributor reserves the right to replace another model with similar function to the customer. The final replaced model and associated cost will be decided by the local distributor.

Importance: The warranty is void if *iWand* is damaged or defective as a result of misuse, abuse, contamination, unauthorized maintenance, parts removal, damaged or rendered defective caused by incorrect input voltage or using components not provided in the product packaging. If customer chooses the representative not appointed or authorized by IPC for repair service, the product warranty will be voided immediately.

TECHNICAL SPECIFICATIONS

Size (HxWxD)：15x15x143 mm or 0.6”x0.6”x5.6”

Weight：30 grams or 0.07 lbs (without accessories)

Power：two 1.5 volt (AAA size) batteries

Wavelength of light output：620 - 645 nm

Maximum power consumption：less than 30 mW

All information provided by IPC is based on standard testing methods designed by Innoworks Product Creation Ltd. Information is subject to change without further notice.

POSSIBLE ONLY BY Euphoria™ Technology

DISCLAIMERS

- IPC has referred to all matters relating to this *iWand* device in this user manual for correct installation and operation. However, IPC will not guarantee against any written mistakes or missing information in this user manual.
- IPC reserves the right to make changes without any notice on the hardware, software or accessories and written content of user manuals.
- This user manual inclusive, must not be duplicated, stored, transmitted or translated in any other language or format without formal written authorization by IPC.
- IPC assumes no liability, obligation or responsibility for any results of misuse of *iWand* ‘s hardware, software and accessories.
- IPC does not guarantee the results of the applications of *iWand*. There are many considerations for the theory of Chinese Acupuncture treatment and meridians. Therefore, the effectiveness of the *iWand* device will always be subject to each application.
